

Chief Executive Officer

PLANET ARK

- Lead community-focused environment NGO
 - Sydney based
-

Planet Ark Environmental Foundation is a not-for-profit enterprise incorporated in 1992. Through its sponsored campaigns, news and information services, Planet Ark works with individuals and businesses to show practical and effective ways in which to reduce our day to day impact on the planet - at home, at work and in the community.

The Board now seeks an experienced, dynamic leader to build on the organisation's existing brand and operational capabilities by expanding Planet Ark's program of activities and funding.

Your role will encompass business development and fundraising, and requires you to liaise effectively with government, business and the general community. You will have demonstrated sound strategic leadership and effective operational and financial management in your previous roles. You will have strong interpersonal skills, experience in marketing and communications and a genuine passion for the environment. Ideally you will have experience in managing social policy issues and a keen understanding of the dynamics of social change.

This is an excellent opportunity to work with a dynamic and practical organisation and to make a real difference in protecting our environment and fostering the adoption of sustainable lifestyles.
